- All measurements are listed in milliliters per gallon of water.
- Apply with every watering.
- The quoted EC values include the EC value of the tap water at 0.4 mS/cm. Attention: the maximum EC value of the nutrient water must be less than 3.0 mS/cm!
- All stated doses are indications and depend on the condition of the plant.

This Grow Schedule is designed for indoor growing and different types of flower and fruit bearing plants, starting with a young plant like a rooted cutting or a week-old seedling.
